

Dear Dr. Lemons and the other Doctors and staff that helped with our dear Dad! Thank you to all of you, for fully engaging with my father with so much skill, knowledge and compassion.

You were there day and night and responded to “on call” requests for assistance, got Dad hooked up- quickly to other specialists, came to a hospice meeting on a Saturday at the Altamonte Springs Hospital, and several very difficult, but necessary conversations with Dad about his health and end of life care. We couldn’t have gotten him through to the end without the entire team.

In cases like my father, when no more healing, or any other options are available, as physicians it must be so difficult to admit. In doing so, you compassionately walked with him and us to and through a gentle passing under the wonderful comforter.

Thank you for allowing this to happen. All of you were gifts of healing we appreciate the time that you allowed all of us to have with Dad.

God bless you, all of you, especially to you Dr. Lemons for your tender care which continues with our mum.

Thank you.
